

Customer Journey Map

Date	10 JULY 2026
Team ID	
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	2 Marks

Phase of Journey	Stage	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Opens the Emotion Detection application. • Selects study field. • Enters learning problem or question.	• Clicks Get AI Learning Help. • BiLSTM and BERT models analyze the input. • Emotion detection and AI response	• Reviews predicted emotions and AI guidance. • Checks analytics dashboard. • Uses recommendations to continue learning.
Touchpoint <i>What part of the service do they interact with?</i>	• Streamlit home page • Input form. • Study field selection	• AI processing engine. • Emotion detection models. • Gemini AI response generation.	• Emotion prediction dashboard. • Learning analytics. • Personalized recommendations.
Student thought <i>What is the student thinking?</i>	• "I hope this system understands my problem." • "Will it give me useful guidance?" • "I need help with this topic."	• "I hope the emotion detection is accurate." • "The response should be quick." • "Can AI really understand my learning difficulties?"	• "The suggestions are helpful." • "Now I understand the concept better." • "I feel more confident to continue learning."

STAGES	STAGE 1	STAGE 2	STAGE 3
Student Feeling <i>What is the student feeling?</i>	• Curious • Confused • Hopeful	• Excited • Engaged • Slightly anxious while waiting	• Satisfied • Motivated • Confident

Customer Journey Map

Mapping the student's learning journey step-by-step, capturing their actions, touchpoints, thoughts, emotions, process ownership, and opportunities for improving the overall learning experience.

Process Ownership <i>Who is in the lead on this?</i>	• Student	• Streamlit Application • BiLSTM Model • BERT Model • Gemini AI	• Student
Opportunities <i>How can we improve this stage?</i>	• Improve input validation. • Add more study fields. • Enhance UI experience.	• Reduce prediction time. • Improve emotion detection accuracy. • Support multilingual input.	• Provide detailed analytics. • Export learning reports. • Recommend personalized study plans.
