

Project Demo Planning

Date	10 July 2026
Team ID	
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, objectives, and problem statement.	0.5	Sahasra Anumolu
2	Solution Overview	Explain the system architecture, technologies used, and workflow.	0.8	Sahasra Anumolu
3	Live Application Demonstration	Demonstrate text input, emotion prediction, AI recommendations, and prediction history.	1.8	Sahasra Anumolu
4	Model Explanation	Briefly explain DistilBERT, BiLSTM, and Hybrid prediction models	0.5	Sahasra Anumolu
5	GitHub & Deployment	Show the GitHub repository and deployed application on Render.	0.2	Sahasra Anumolu
6	Conclusion & Future Scope	Summarize achievements and discuss future enhancements.	0.2	Sahasra Anumolu

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why emotion detection is important for personalized learning support.
2	Solution Overview	Describe the Flask application, machine learning models, and Google Gemini API integration
3	Live Feature Demonstration	Enter sample text, predict emotion, display learning recommendations, and show prediction history

4	Q&A Session	Answer questions about implementation, technologies, performance, and future enhancements
